

A BRIAN FOR THE FUTURE

Three years ago, Rosedale Bible College and Rosedale Mennonite Missions teamed up to purchase a 140-acre farm adjoining the campus currently shared by RBC, RMM and Conservative Mennonite Conference. Administrators from those institutions have been busy in that time determining the best use and layout of the additional land in the interest of all three parties.

Working together with the assistance of an architect from Beilharz Architects, a firm in Defiance, Ohio, they have, after many drafts, designed a campus master plan that meets the needs of RBC, RMM and CMC. This map, finalized in February of this year, represents their work.

Points of Note:

- The campus plan has been divided into short-range and long-range sections. The shaded area on the map represents the long-range portion of the campus plan.
- The campus plan was designed to accommodate four possible stages of future growth for Rosedale Bible College, the larger player in the land purchase.
 - 1 Stage 1 was called the "no growth" stage; the design of this stage was based on RBC's campus needs if the size of the student body remains at its current level of 80 full-time students.
 - 2 Stage 2 would accommodate 150 full-time students
 - 3 Stage 3 would accommodate 300 full-time students
 - 4 Stage 4 would accommodate 400 full-time students.
- The plan is designed to guide RBC in its potential future growth. Great care was taken to design the campus in such a way that new facilities can be built when—and if—increased enrollment requires them.
- The student center, located just north and west of the existing chapel, is the first facility RBC hopes to erect. Additional student housing would likely be next on the list.
